### Introduction:

India is a developing country, industrial development is taking place day by day as a result of this. The Problem of Pollution is continuously increasing creating depletion of environmental settings and Hazards to human life. Various Laws have come in force time to time to prevent the Environmental Pollution to help industries to fight with this problem such as Water (Prevention & Control of pollution) Act, 1974, the Air (Prevention and control of pollution) Act, 1981, and the Environment (Protection) Act, 1986. Now a days it is an established fact that industry and Environment should go hand-in-hand to achieve sustainable Development. Also awareness from the experiences of pollution in the previous years has brought into realization to consider environment protection necessary.
